

## Style tips to pair up Denims this season

**Gunjan Karmakar, DGM in Denim Design, Flying Machine** has given style tips to pair up your denims this season and keep your trend game strong.

### **Style Tip #1 Show your man ankles.**

Try the coolest new trend in denim fits. Slim fitted jeans these days have a cropped length that's urban, playful and trendy and real easy to go with your plain colored T-shirt and trendy white sneakers.

### **Style Tip #2 Cuff your skinny jeans.**

The 80's fun time is back. Roll-up your skinny jeans and be a dude. Excess jeans length going under your shoes is not in trend now. Instead, roll them up or give them two neat folds which would be a perfect relaxed look for this summer.

### **Style Tip #3 Skinny is the new cool.**

Loose jeans is completely out of trend and long gone and forgotten. Get into skinny fit jeans paired with a slim fit shirt and loafers. This look would be perfect for an evening with friends or family. So, sit back and relax or run off and dance!

### **Style Tip #4 Joggers Jeans.**

For those who are the athletic types and still don't want to part ways with their jeans, Joggers is the answer. These jeans are made in a special knitted denim that has the comfort of knit pants and the DNA of a jeans. They have elasticated bottom and a relaxed fit around the thighs for the active soul inside you. Pair them up with a cool T-shirt to up your cool quotient.

### **Style Tip #5 Black is here to stay.**

Black jeans are never out of fashion. With athleisure fashion taking center stage, black jeans in all its shades are the "Must Haves" for this season. Go Funky, Go Black.
